## Resume

Software Engineer and also trained as an IT technician in TECPUC, I always try to do my best to solve challenges imposed on me, I have knowledge in different areas of technology, from the front and center software development area backend to the area I love working in, which is the data area, analyzing data is combining creativity with statistics and mathematics, technology grows and updates every day, so we must become good professionals and adapt to develop skills that help us understand that hard skills are learn but what differentiates is the ability to adapt to find the best way to solve the problem.

## Professional Experience:
